

KOTEESH VIJAYASEKAR THUGUNDRAM

BI Developer | Power BI | Microsoft Fabric | Data Analytics

📍 Dublin, Ireland • ✉ koteesh85@gmail.com • 🔗 linkedin.com/in/koteesh • 🌐 datascienceportfol.io/koteesh85 •
💻 github.com/koteeshv08 • ✅ Irish Stamp 1G – No Sponsorship Required

PROFESSIONAL SUMMARY

Results-driven BI Developer with 2.5+ years of enterprise experience designing and delivering end-to-end Power BI solutions at scale. Proven track record serving 10,000+ global users at Software AG, reducing manual reporting effort by ~75% and cutting dashboard outages by ~40%. Hands-on expertise across Microsoft Fabric (Lakehouse, OneLake, Spark Notebooks, Direct Lake, Deployment Pipelines), advanced DAX, Row-Level Security, and Azure Data Factory. MSc research produced a novel Causal-QMIX framework applying causal inference (CATE) to multi-agent reinforcement learning, demonstrating depth in Python, PyTorch, and statistical modelling beyond typical BI profiles. Holds PL-300 (Power BI Data Analyst Associate) certification. Eligible to work in Ireland without sponsorship; open to Cork, Dublin, continental Europe, and remote-first roles.

KEY ACHIEVEMENTS

- Designed and maintained Power BI dashboards consumed by 10,000+ users across global teams at Software AG.
- Reduced manual reporting effort by ~75% through automated pipelines via Azure Data Factory and Power Automate.
- Cut dashboard outage rate by ~40% by implementing robust data validation layers and alerting workflows.
- Received SPOT Award at Software AG for exceptional performance in data engineering and BI delivery.
- Built Medallion Architecture solutions on Microsoft Fabric (Bronze/Silver/Gold Lakehouse) accelerating data availability.

KEY PROJECT — MSc RESEARCH

Project: Causal Influence–Guided Multi-Agent Reinforcement Learning in StarCraft II
Institution: University of Galway | MSc Data Analytics | Supervisor: Dr. Frank Glavin | Aug 2025
Code: github.com/koteeshv08/CT5108-Causal-HAMRL (PyTorch, PyMARL, SMAC/StarCraft II)

- Contribution:** Designed and integrated a Conditional Average Treatment Effect (CATE) module into the QMIX multi-agent RL framework to estimate the causal influence of individual agent actions on team outcomes — demonstrating depth in statistical modelling and ML pipeline engineering.
- Results:** Achieved +8.5% win-rate improvement and ~14% faster episode resolution vs. baseline QMIX on symmetric StarCraft II scenarios; benchmarked across 5 SMAC maps (3m, 2s3z, 5m_vs_6m, MMM2, Corridor).
- Stack:** Built in PyTorch 1.13 with custom neural network architecture (89→64→32→1), causal-aware prioritised replay buffer, and full reproducible codebase published on GitHub.

PROFESSIONAL EXPERIENCE

BI Engineer / Power BI Developer | **Software AG**

Aug 2022 – Aug 2024 • Remote / India

(Started as Intern Aug 2022 → promoted to Assistant Consultant)

- Architected and deployed 20+ enterprise Power BI dashboards supporting global finance, operations, and HR functions for 10,000+ users across 70+ countries.
- Engineered advanced DAX measures, calculated tables, and time-intelligence formulas to deliver self-service analytics with Row-Level Security (RLS) for role-based data access control.
- Built and maintained ADF pipelines ingesting data from SQL Server, SharePoint, and REST APIs into Azure Data Lake Gen2, reducing ETL processing time significantly.

- Migrated legacy reports to Microsoft Fabric: implemented Lakehouse (OneLake), Spark Notebooks (PySpark), Dataflows Gen2, and Direct Lake mode to reduce dataset refresh latency.
- Developed Power BI Embedded solutions integrated into internal portals, enabling non-technical stakeholders to access governed analytics without a Power BI licence.
- Deployed deployment pipelines (Dev → Test → Prod) and semantic models for CI/CD governance across the BI estate.
- Automated repetitive operational tasks using Power Automate and built Canvas Apps in Power Apps, eliminating ~75% of manual reporting effort across three departments.
- Collaborated with business analysts, data owners, and IT to translate complex requirements into scalable BI solutions; presented findings directly to senior leadership.

EDUCATION

MSc in Computer Science (Data Analytics)

2024 – 2025

University of Galway, Ireland | Grade: 2.1 (Upper Second Class Honours)

Key modules: Machine Learning, Big Data Analytics, Statistical Inference, Data Visualisation, Cloud Computing

Dissertation: *Causal Influence-Guided Multi-Agent RL in StarCraft II — CATE-based prioritised replay integrated into QMIX framework (PyTorch)*

BEng in Computer Science

2018 – 2022

MS Ramaiah Institute of Technology, India | Grade: First Class

CERTIFICATIONS

- Microsoft PL-300: Power BI Data Analyst Associate — Microsoft (Active)
- DP-600 (Fabric Analytics Engineer) — In preparation (recommended next step)

TECHNICAL SKILLS

BI & Visualisation

- Power BI Desktop & Service (Advanced DAX)
- Row-Level Security (RLS) & Object-Level Security
- Power BI Embedded
- Semantic Models / Tabular (XMLA Endpoint)
- Deployment Pipelines (Dev/Test/Prod CI/CD)
- Dataflows Gen2 & Power Query (M)

Microsoft Fabric & Cloud

- Microsoft Fabric: Lakehouse, OneLake, Direct Lake
- Fabric Spark Notebooks (PySpark)
- Azure Data Factory (ADF) – Pipelines & Triggers
- Azure Data Lake Gen2 (ADLS Gen2)
- Medallion Architecture (Bronze/Silver/Gold)
- Power Automate & Power Apps (Canvas)

Data Engineering & Languages

- SQL / T-SQL (advanced queries, stored procedures)
- Python: pandas, PySpark, numpy, PyTorch (ML/RL research)
- PostgreSQL
- VBA (Excel Automation)
- Git / GitHub (version control & reproducible research)

Soft Skills & Domain

- Stakeholder Management & Requirements Gathering
- Agile / Scrum delivery
- Cross-functional collaboration (Finance, HR, Ops)
- Data Storytelling & Executive Reporting
- Self-Service Analytics Enablement

ADDITIONAL

- Work Authorisation: Irish Stamp 1G visa — fully authorised to work in Ireland.
- Languages: English (professional proficiency), Telugu (native), Hindi (professional proficiency).
- Portfolio: datascienceportfol.io/koteesh85 | LinkedIn: linkedin.com/in/koteesh
